

SV19 LED GEN II Underwater Light

Thru-Hull Mount, LED Retrofit

The SV19 LED Retrofit Kit is designed to serve as a direct replacement for the SV19 HID components without the need for replacing the thru hull. The internal ballast of the HID light is replaced with an external LED driver that can be mounted in a convenient dry location.

Installation:

Unless other housing components need replacement, the SV19 LED Retrofit Kit installation can be performed while the vessel remains in the water.

Remove existing HID components shown in Figure 1 per SV19 HID Thru Hull Light Installation Manual.

Install supplied new LED components shown in Figure 2 per supplied SV19 LED Thru Hull Underwater Light Installation Manual.

Troubleshooting:

Please contact our Florida technical support staff at 1-954-760-4447 or French technical support staff at +33 (0) 497 21 0296, Monday thru Friday from 8:00 am to 5:00 pm local time.
